Tirth Chokshi

Ahmedabad,Gujarat, India
Mobile: +91 7228864643
Email: tirthchokshi20@gmail.com
LinkedIn: https://www.linkedin.com/in/tirth-chokshi-44b355295/
GitHub: https://github.com/tirth12345

Nationality: Indian

Personal Profile

Tirth is a dedicated backend and frontend developer with a strong track record in designing and developing innovative projects and programs. Experienced in both independent and team-oriented environments, Tirth consistently delivers high-quality work. In addition to technical skills, Tirth excels in writing insightful blogs and creating exceptional programs, particularly in the realm of web development.

Education

Jun 2009 – Apr 2021 : Elementary School, Middle School
Nirma Vidya Vihar, Ahmedabad

Jun. 2021 - Jun. 2023 : High School
The H B Kapadia High School , Ahmedabad

Jun. 2021 - Jun. 2023 : High School
The H B Kapadia High School , Ahmedabad

Aug. 2023 - June 2027 : UG-BTECH(CSE-AI/ML)
Adani University FEST , Ahmedabad

Experience

Student Internship
Silver Touch Technologies Ltd During my student internship at Silver Touch Technologies Ltd, I had the opportunity to gain practical experience in Python programming, and machine learning. This experience provided me with valuable insights into the practical application of my skills in a professional environment.

- On-site Internship Experience and had a chance to work with a Professional .
- Gained experience regarding Python Development, Machine Learning, and data science
- Gained valuable insights into the practical application of my skills in a professional environment, laying a strong foundation for my future career goals in machine learning.

Machine learning Intern
Cognifyz Technologies During my Internship at Cognifyz Technologies, I had an opportunity to work on different tasks related to Machine Learning provided to test and deepen my Knowledge regarding Python Programming, AI-ML concepts.

- Built projects using the insights gained during this internship as a part of the project internship
- Gained Insights on Machine Learning / AI Algorithms and Python Programming.

Projects/Research

Airplane Ticket Price Prediction AI Mode
This project leverages advanced machine learning techniques to predict the prices of airplane tickets. By analyzing historical data, trends, and various influential factors

- Historical Data Analysis: Utilizes extensive historical data to identify trends and patterns in ticket prices.
- Feature Engineering: Considers various factors such as time of booking, seasonality, airline, destination, and more to enhance prediction accuracy.
- Machine Learning Models: Employs state-of-the-art machine learning algorithms including Linear Regression, Random Forest, and Gradient Boosting for robust predictions. -Visualization: Provides graphical representations of price trends and predictions for better understanding and analysis.

Ride Booking Outcome Predictor
This project trains a Random Forest model on the dataset and provides a Streamlit UI to predict booking outcomes.

- User Data Analysis: Analyzes user data to identify trends and patterns in booking status.
- Feature Engineering: Considers various factors enhance prediction accuracy.
- Machine Learning Models: It uses Random Forest, and Gradient Boosting for robust predictions. -Visualization: Provides graphical representations of price trends and predictions for better understanding and analysis.

Employee Management System

The Employee Management System is a robust and user-friendly application designed to streamline employee and task management processes for organizations. This project provides an all-in-one solution for efficiently managing employee data, tasks, and roles while incorporating secure authentication features.

0.0.1 Employee Management

- Create, Update, Delete Employee Records: Easily manage employee information.
- Role Assignment: Assign specific roles to employees based on their responsibilities.

0.0.2 Task Management

- Task Creation and Updates: Create and edit tasks to reflect changing priorities and deadlines.
- Task Assignment: Assign tasks to employees with clear and defined roles and responsibilities.
- Task Tracking: View tasks and their status in an organized manner.

0.0.3 Communication Features

Email Notifications: Send emails to employees for task assignments, updates, or general communication.

0.0.4 Security

Encoded Passcode System: Secure employee data with an encoded passcode system to prevent unauthorized access.

Skills

Python, Computer Skills , MERN STACK, Machine learning , Communication skills , Problem-solving , Fast Learner
Languages: English (Fluent), Gujarati (Native),Hindi(Fluent)
